### Testimonial

Dual Metallising and Peter Franks are suppliers of quality finished product to our company and have been so for the past five years. Prior to our association with Peter we were continually being let down by poor quality and false information from other companies in this field.

It is important in our industry to have suppliers like Dual Metallising that are flexible and reactive to our ever increasing demands and deliver the high quality expected from the blue chip companies that we represent which is why we are pleased to have them as our supplier.
